PROFESSIONAL EXPERIENCE

Senior Consultant – Project Manager | Scrum Master | April 2024 – Present

Ernst & Young LLP | Pune, IN

Lead cross-functional global teams delivering high-stakes enterprise software solutions, specialising in large-scale ERP transformations and Agentic AI implementations. Drive project governance, strategic roadmap execution, agile methodologies, and strategic alignment between technical delivery and executive vision.

- ▶ **Leading Multinational Software corporation — SAP ECC to S/4HANA Migration**
- **ERP Transformation Delivery:** Executed **end-to-end program management governance** for a large-scale SAP ECC to S/4HANA transformation, achieving zero unplanned business downtime and a **94% system adoption rate** post-go-live, by guiding a **40+ person cross-functional team** through complex system architecture alignment and comprehensive change management strategies.
- **Timeline & Release Management:** Orchestrated **multi-tiered deployment schedules** across staging, QA, and production environments, synchronising rollouts without disruption to live operations, keeping **complex schedules aligned** and **removing roadblocks**.
- ▶ **Global Life Science & Healthcare Consulting Firm — Agentic AI Platform Delivery**
- **AI Product Delivery:** Directed the full-lifecycle delivery of an enterprise-grade **Agentic AI platform**, deploying **autonomous agents to automate demand forecasting**, vendor communication, and predictive logistics workflows — driving **technical projects** from requirements through launch and landing platform integrations on time by leading a **35-person team**.
- **Program & Organization Effectiveness:** Worked with leadership to transform the effectiveness of the organization. Created **processes, frameworks, and productivity metrics** to constantly raise the execution bar and simplify complex developer workflows.
- ▶ **Core Agile Execution (Both Engagements)**
- **Agile Leadership & Velocity:** Drove a **25% increase in team velocity** across multiple high-performing pods by functioning as dedicated Scrum Master, leveraging Jira for backlog grooming and sprint tracking, and facilitating all core **Scrum ceremonies (Planning, Standups, Refinement, Reviews, Retrospectives)**.
- **Risk & Governance (RAID):** Owned and aggressively managed the **RAID log**, proactively identifying critical-path dependencies between legacy SAP architecture and **modern AI integrations** to eliminate blockers before they impacted delivery.

- **Actionable Insights & Reporting:** Conducted high-visibility reviews, **analyzing program, latency, and process metrics** to build **actionable insights and dashboards** that drive engineering decisions, continuous improvement, and steering committee alignment.

Consultant – Project Manager | Scrum Master | March 2022 – March 2024

KPMG Global Services | Bengaluru, IN

- **Teir-1 Global Investment Bank — IT Program Delivery:** Managed **Agile delivery teams** for high-priority technology programs in a fast-paced, compliance-driven financial services environment, successfully reducing delivery cycle times and increasing team velocity by championing **Scrum and Kanban frameworks**.
- **Fortune 500 Energy and Petroleum Leader — Enterprise IT Management:** Led cross-functional project teams for complex enterprise IT initiatives in the energy sector, ensuring **strict schedule adherence and robust resource planning** while maintaining alignment through **proactive risk management**.
- **Executive Stakeholder Alignment:** Established and maintained **strong relationships across client engagements**, translating intricate technical complexities into clear, **data-driven reporting** to keep leadership synchronised throughout the delivery lifecycle

Scrum Master | April 2018 – January 2022

Tata Consultancy Services | Mumbai, IN

- **Velocity Optimisation:** Accelerated team delivery velocity **by 20% across 2 cross-functional teams** by establishing Agile workflows in Jira and Wrike, monitoring sprint health, and proactively eliminating blockers.
- **Data-Driven Predictability:** Boosted **sprint predictability by 15%** through meticulous analysis of Agile metrics (burndown and cumulative flow charts) during team retrospectives.
- **Backlog & Product Owner Alignment:** Streamlined execution timelines and reduced scope ambiguity by partnering closely with Product Owners to champion regular backlog refinement and define robust user story acceptance criteria.
- **Knowledge Management:** Standardised team playbooks and operational documentation by building a centralised Agile repository in Confluence, significantly improving cross-functional collaboration and onboarding.
